## PromoJET-Rotary Inkjet for Cylinders

The unique Rotary Fixture designed for the PromoJET inkjet allows printing around the circumference of cylindrical items such as stainless steel water bottles, pens and flashlights. With the PromoJET-Rotary, one can print up to 360 degrees on cylinders ranging in diameter from 3/8" to 5".

When high quality printing is needed on flat items, it takes only 5 minutes to change the machine from rotary to flatbed printer. The DC driven tooling table (13" x 26"), onto which parts can be tooled easily for multi-part decoration, enables easy decoration of promotional products and gifts like plastic and metal pens, lapel pins, golf balls, CDs, plaques, mint tins, credit cards and a wide range of other items.

The PromoJET inkjet system is ideal for any graphic printed on a light colored or white substrate and offers incredible benefits when running four-color process, gradients or multi-color printing jobs. With this direct-to-part system, just print the digital file to the inkjet – and within minutes your products are decorated with crisp graphics.

The PromoJET features an 8 color ink jet head. Specialized RIP software controls the color reproduction and the overall amount of ink laid on the product.

### STANDARD FEATURES

#### ROTARY CONFIGURATION:

*Friction print shafts with bearings*

*Adjustable stop with shaft*

*Retrofit tooling mount*

*Setup registration tool*

#### FLATBED CONFIGURATION:

*13" x 26" tooling platform*

*5" vertical height adjust*

*Automatic platform height adjustment (z-axis)*

### STANDARD LIMITS

Palette: Cyan, Light Cyan, Magenta, Light Magenta, Yellow, Black

Connectivity.....USB

Maximum Resolution.....2400 x 2400

Compatible Software.....Adobe Illustrator, Photoshop, CorelDraw

#### ROTARY CONFIGURATION:

Cylinder diameter.....from 3/8" to 5"

Cylinder length.....from 1.5" to 11.5"

Maximum image length.....11.5"

#### FLATBED CONFIGURATION:

Maximum Print area.....12.8" x 19.7"

Maximum Part Height.....5"

### POWER REQUIREMENTS & DIMENSIONS

Current/Voltage (1 phase/50-60 Hz.).....5A/110V

Typical Dimensions (L x W x H).....26" x 34" x 24"

Approximate weight (lbs.) net/crated.....82KG

Crate Size (L x W x H).....45" x 63" x 65"

LWH - Length, width, height IPH - Impressions per hour  
L/R - Left to right
