ICN-M15 FP

SEMI-AUTOMATIC SCREEN PRINTER

The ICN-M15 FP is one of the finest, most flexible and easiest to operate flatbed screen printers available on the market today. This heavy duty machine can print images up to 17" x 12". The M15 FP has an ample height capability compared to many other flatbed screen printers: it accommodates parts up to 5" in height. The setup of the printer is simple due to its 4 way micro-adjust screen clamp system and micro-adjust print head. The vertical motion tooling table drops to have an operator unload a product, which helps increase production speeds on even the most difficult parts. The ICN M15 FP is a highly productive, cost effective screen printing system ideal for parts like nameplates, promotional products, panels, signs and other flat items.

STANDARD FEATURES

- 12" x 17" Vacuum Tooling Table*
- 4 Way Micro Adjust Screen Clamp*
