

### **'Diamond Etch' Ink for Glass and Stainless Steel from Inkcups Now**

Inkcups Now Corp. unveils 'Diamond Etch' Ink formulated to imitate engraving on glass and stainless steel items such as Champaign glasses, travel mugs and souvenirs. This unique ink allows simulating sand-blasted or laser-etched graphics using pad printing or screen printing. "With 'Diamond Etch' ink you don't need a laser," says Inkcups Now representative, "Several customers have already tested it on cups and wine glasses with excellent results. They found that for long runs, printing allows time savings over laser etching, while yielding very similar look and extremely durable graphics."

As all Sapphire Ink Series, "Diamond Etch" ink has high mechanical and chemical resistance and complies with California Proposition 65. Find more information at [www.inkcups.com](http://www.inkcups.com) or contact Inkcups Now at 978-646-8980 or [info@inkcups.com](mailto:info@inkcups.com).
