

ICN-2506C - 6 Color Automatic Pad Printer with Carousel from Inkcups Now Corporation

Inkcups Now Corporation has introduced the ICN-2506C – a 6 color pad printer with carousel and automatic pad cleaning attachment. This piece of pad printing equipment is designed for multicolor printing on small three-dimensional or flat parts. This pad printing machine is especially good for 4 color process printing over dark substrates, where you can print two hits of white as well as CMYK. The 18 station carouse has print station with shot pin registration and assists the automation of the pad printing production. The programmable pad cleaning function allows cleaning of all 6 print pads within a few seconds, which facilitates quality prints, uninterrupted production and saves a considerable amount of time.

The ICN-2506C pad printer offers rapid job setup and changeover featuring: XYR micro-adjust plate holder assemblies and quick-release locking handles on pad and cup assemblies. Setup can be accomplished easily, without the use of any tools, and features the patented VersaCup ink cup assembly with two-sided ceramic ring. This durable 6 color pad printer has ample compression capability and is able to accommodate large, hard print pads – making it one of the most versatile, capable and cost effective multi-color pad print machines available on the market today.
