

ICN-B100 Tabletop Pad Printer from Inkcups Now Corporation

Inkcups Now Corporation has recently introduced ICN-B100 sealed cup pad printer, a single color compact tabletop machine manufactured for demanding heavy duty performance. The B100 has a robust pad compression capability of 120 lbs at 80 PSI. An illuminated plate system provides visibility to the work area; the variable inking and print frequency controls allow the operator to regulate print opacity.

This pad printer handles items as tall as 4.25 inches in height, including the part fixture. In addition to promotional products, medical and electronic devices, it is perfectly suited for printing apparel tags that today are rapidly replacing thermal transfer labels in the apparel manufacturing industry. This machine can be easily set up for efficient printing on tagless t-shirts and other garments.
