

X2

INKCUPS

The X2® is an industrial, high-speed UV LED flatbed inkjet printer. It supports uni- or bi-directional CMYKWW or CMYKWV printing and is the perfect choice for single or multi-color printing on promotional and industrial products, high-volume packaging, personalized souvenirs and customized gifts.

The X2® contains the same high-quality components of its larger counterpart, the XJET, but in a more compact machine. The print system includes automatic maintenance for purging, wiping and capping, variable dot size for producing sharp images with a smoother gradient, and dual UV LED air-cooled lamps.

Equipped with high-resolution print heads capable of covering a print area of 21 x 25 inches (540 x 640 mm), the X2® delivers vivid color and fine detail, while integrating seamlessly with the finest color management and RIP software on the market.

FEATURES

FLAT OR SLIGHTLY CURVED ITEMS

BED SIZE: 21" X 25"

**INK CONFIGURATION:
CMYKWW OR CMYKWV**

MAXIMUM PART HEIGHT: 6"

**MAXIMUM RESOLUTION:
1200 X 1200 DPI**

COMMON APPLICATIONS:

- Sporting goods
- Electronics
- Edible items
- Coasters
- Promotional items
