

2200-PS

INKCUPS

2200-PS

The 2200-PS is a two-color sealed cup pad printer equipped with a heavy-duty dual position pneumatic pad slide mechanism. The added feature of the second pad-slide mechanism allows for flawless second color registration on several items including drinkware, plastic molded products and apparel. The 2200-PS accepts 100mm x 250 mm plates and prints up to 80mm in diameter. For added flexibility, this machine can also be retrofitted to utilize 100 x 225 mm plates using our conversion kit. This enables customers who have both a B100 and a 2200-PS to reduce inventory to just one plate size.

This pad printing machine's membrane touch control makes it simple to program all setup features. The XYR micro-adjust plate-holder assemblies and tool less quick-adjust further reduce make-ready time and increase productivity.

FEATURES

ONE OR TWO COLOR PAD PRINTER

**AVERAGE PRODUCTION SPEED:
700-1100 IPH**

**MAXIMUM ARTWORK SIZE:
3.14" (80MM)**

PLATE SIZE: 100MM X 250MM

CURRENT/VOLTAGE: 10A/110V

DIMENSIONS (L x W x H): 32" x 22" x 55"

COMMON APPLICATIONS:

- Marketing items
- Industrial items
- Sporting goods
- Plastic molded items
- Apparel
