INKCUPS

# B100-PC

The B100-PC pad printer is a compact tabletop single-color sealed cup pad printer that incorporates our patented VersaCup ink cup assembly with a two-sided ceramic ring. This unique pad printer includes a pad cleaning function which allows an operator to frequently clean the pad of any sediment or fibers to ensure a perfect print every time. The B100-PC offers a tool-less setup to support rapid job changeover for any type of project. This machine is designed to handle items as tall as 4.25 inches (108mm) in height, including the part fixture. It has a robust pad compression capability of 120lbs at 80 PSI.

An illuminated plate system provides visibility to the work area and the variable inking and print frequency controls allow the operator to regulate print opacity. The intuitive membrane touch control feature provides ease of program adjustment and machine functions.

## FEATURES

**ONE- COLOR PAD PRINTER**

**AVERAGE PRODUCTION SPEED:  
900 - 1300 IPH**

**MAXIMUM ARTWORK SIZE:  
3.14" (80MM)**

**PLATE SIZE: 100MM X 225MM**

**CURRENT/VOLTAGE: 5A/110V**

**DIMENSIONS (L x W x H): 26" x 19" x 23"**

## TYPICAL APPLICATIONS:

- Apparel
- Medical
- Toothbrushes
- Automotive parts
- Textured items
