

B150

INKCUPS

B150

The B150 pad printer is a tabletop single-color sealed cup pad printer that incorporates our patented VersaCup ink cup assembly with a two-sided ceramic ring for large images. The powerful compression capability of 779lbs allows for easy handling of large, hard print pads which enables the highest quality print on drinkware, tools and other products up to 5.5 inches in height (including the fixture). Unlike most pad printers of similar size, the B150 features the ability to program variable pad delays (both over the part and plate), print speed and double print function, all of which gives the operator complete control over the printing cycle and print opacity.

Cut your supply costs in half with the optional Adjustable Stroke Modification Kit designed to modify the B150 to accept smaller plate sizes (100mm x 250mm) as well as a smaller cup size (90mm or 135mm).

COMMON APPLICATIONS:

- Larger apparel labels
- Drinkware
- Tools
- Metal fabricated items
- Marketing items

FEATURES

ONE COLOR PAD PRINTER

**AVERAGE PRODUCTION SPEED:
1400 - 1600 IPH**

**MAXIMUM ARTWORK SIZE: 5.5"
(140MM)**

**PLATE SIZE: UP TO 160MM X
360MM**

CURRENT/VOLTAGE: 5A/110V

**DIMENSIONS (L x W x H): 35" x 19" x 30"
889 mm x 483 mm x 762 mm**

WEIGHT: 260 lbs (118 kg)
