Section 4: First aid measures

4.1. Description of first aid measures

First aid measures after inhalation

- -Remove the exposed person to fresh air.
- -If breathing difficulties persist, seek medical advice.

First aid measures after skin contact

- -If UV inks are splashed, remove contaminated clothing, avoid exposure to direct sunlight or any source of UV radiation.
- -Rinse with lots of water for at least 10 minutes, do not use solvents or diluents, use a skin cleanser (soap etc.).
- -Seek medical advice if necessary.

First aid measures after eye contact

- Avoid exposure to direct sunlight or any source of UV radiation.

Remove contact lenses if present and easy to do, rinse with plenty of water for at least 10 minutes, holding the eyelids apart.

-Seek medical advice if necessary.

First aid measures after ingestion

- -DO NOT INDUCE VOMITING.
- -In the event of spontaneous vomiting, clear the airway and seek immediate medical attention.

4.2. Most important symptoms and effects, both acute and delayed

The severity of the symptoms described will vary depending on the intensity and duration of exposure.

4.3 Indication of any immediate medical attention and special treatment needed

No specific first aid measures.

Section 5: Firefighting measures

5.1. Extinguishing media

Suitable Powders, foams and water spray

Unsuitable Pressurized water

5.2. Specific hazards arising from the substance or mixture

- -Some products may polymerize at high temperatures
- -The polymerization of this product is sufficiently exothermic to cause thermal decomposition or explosion of containers
- -Thermal decomposition may release irritating fumes, gases or flames, which can, in turn, cause health problems In case of fire, a dense, black, acrid smoke is produced

5.3. Advice for firefighters

- -Firefighters are to be equipped with self-contained breathing apparatus.
- -Spray any unopened drums exposed to fire shouldwith water to keep them cool.
- -Keep run-off water out of sewers and waterways. In the event of spillage, notify the competent authorities.

SDS No. 4323 **Revision date** 20/12/18 **Revision** 0 5/13

Section 6: Accidental release measures

6.1. Personal precautions, protective equipment and emergency procedures

Keep away from sources of ignition, do not breath vapour (see sections 7 and 8), avoid contact with skin and eyes, remove contaminated clothing immediately.

6.2. Environmental precautions

Do not discharge into drains or water courses; comply with current legislation.

6.3. Methods and materials for containment and cleaning up

Use absorbent materials (e.g. sand, diatomaceous earth), clean with a detergent, avoid the use of solvents, dispose of waste in accordance with current legislation.

6.4. Reference to other sections

Refer to Section 8 for personal protective equipment and Section 13 for disposal considerations.

Section 7: Handling and storage

7.1. Precautions for safe handling

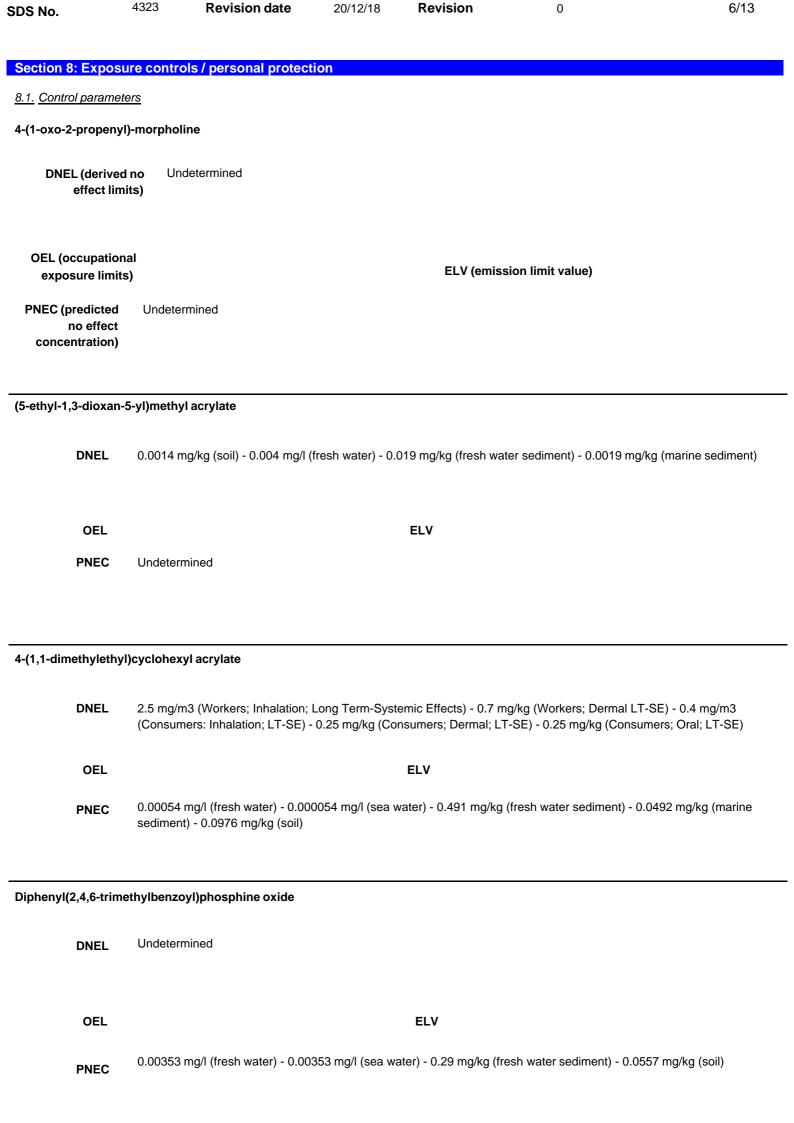

- -Before handling, refer to Sections 3, 8 and 11
- -Anyone with a history of skin sensitization must handle the product with special care
- -Avoid breathing vapour (see sections 7 and 8)
- -Avoid contact with skin and eyes
- -Follow relevant national occupational hygiene regulations
- -Do not drink, eat or smoke in work areas
- -Wash hands after use

7.2. Conditions for safe storage, including any incompatibilities

- -Store in original containers at room temperature
- -Opened containers must be tightly closed and kept upright to prevent leaks
- -Keep away from sources of ignition, protect from direct sunlight
- -Keep away from oxidizing agents, acids and bases

7.3. Specific end use(s)

Refer to Section 1.2.

8.2.2. Personal protective equipment

Eye and face protection

The use of safety goggles is recommended to protect against splashing.

Hand protection

It is possible to use special protective creams; these should not be applied after contamination. Do not use gloves made of natural rubber or PVC. It is possible to use disposable single-use gloves.

Skin protection

Wear suitable clothing, do not wear contaminated clothing.

Respiratory protection

In the case of frequent use or heavy exposure, respiratory protection may be necessary. Wear an appropriate mask. Vapor extraction or effective ventilation should be provided at workstations.

8.2.3. Environmental exposure controls

Do not discharge into drains or water courses.

Section 10: Stability and reactivity

10.1. Reactivity

Reacts with oxidizing agents, acids, bases.

Solar radiation and heat can cause hazardous polymerization.

10.2. Chemical stability

The product is stable under the handling and storage conditions recommended in Section 7.

10.3. Possibility of hazardous reactions

UV-curable formulations contain chemicals that can become unstable (exothermic reactions) under the following conditions:

10.4. Conditions to avoid

Prolonged exposure to temperatures above 40 °C Prolonged exposure to light and UV radiation

10.5. Incompatible materials

Oxidizing agents, acids, bases.

10.6. Hazardous decomposition products

Thermal decomposition may release irritating fumes, which can, in turn, cause health problems

Symptoms/injuries after ingestion

Ingestion may cause nausea, weakness and effects on the central nervous system.

Symptoms/injuries after skin contact

The acrylic components of UV-curable inks have irritant properties. Prolonged contact with skin or mucous membranes may cause allergic reactions (rash, dermatitis, blistering)

Symptoms/injuries after eye contact

Contact with the eyes may cause irritation.

Section 12: Ecological information

No experimental data is available for this product. The information presented below relates to the individual ingredients for this product. This information was obtained from tests carried out by our suppliers.
