

Head Recovery System

For the XJET & X2 Inkjet Printers

Effectively restore clogged nozzles on XJET & X2 print heads with the Head Recovery System from Inkcups Now! This automatic flushing system utilizes pump technology to continuously flow Nozzle Restore through the print head in order to loosen and remove hardened debris. Simply connect the hose to the desired print head, reposition the container to catch the falling liquid and plug it in! The unit will do all the hard work and you can walk away.

STANDARD FEATURES

- *No syringe needed – Eliminates the risk of using too much force with syringe*
- *Handy and portable*
- *Operator can hook it up and leave it running for a period of time vs multiple manual flushes*
- *Always filtered*
- *Can be used on various machines and multiple print heads*
- *Higher % of recovered nozzles when worked on as soon as you see nozzle loss*
- *Only one person needed to operate opposed to multiple people when flushing manually.*
- *Great tool to quickly prepare a machine for a long weekend or holiday lay off.*
