

# MINI MAGICOAT™

PRE-TREATMENT SYSTEM

INKCUPS

The Mini MagiCoat™ Pre-Treatment System is a total solution for pre-treating glass for UV digital and UV screen inks as well as metalized coatings in a smaller footprint! With the Mini MagiCoat™ Pre-Treatment System, items are uniformly flame-treated to the proper temperature and then sprayed with MagiCoat™ all in the matter of seconds!

This system boasts 4 stations that rotate individually while going through the system. Each item is flame treated to eliminate debris and coatings put on glass that inhibit adhesion. Afterwards, the item is spray primed with the waterbased MagiCoat™ to create an additional anchor for the inkjet ink to stick to.

MagiCoat™ is a water-based, 3 part primer. With its use, glassware is able to withstand up to 200\* residential washes and up to 600\* industrial washes. Additionally, MagiCoat is FDA 21 CFR 175.300, CPSIA and California Prop 65 compliant.

## FEATURES

**PRETREAT UP TO 10 ITEMS/MIN.\*\***

**1 FLAMING STATION AND  
1 FLAMING HEAD**

**FINE MIST SPRAYING SYSTEM FOR  
MAGICOAT™ APPLICATION**

**UP TO 600\* INDUSTRIAL WASHES**

**UP TO 200\* RESIDENTIAL WASHES**

### POWER REQUIREMENTS & DIMENSIONS

**Voltage:** 220 VAC, Single Phase, 15 Amp

**Dimensions (L x W x H):** 39.5" x 35.5" x 67"  
(1003 mm x 902 mm x 1702 mm)

**Approximate weight:** 1284 lbs (582 kg)

\*Wash testing could be more (or less) depending on type of glassware used, detergent and temperature of wash. \*\*typical ppm
