

## Flexible UV Ink for Flatbed Digital Inkjet Printers

Introducing XFLEXX UV LED flexible ink! XFLEXX is the most durable UV flexible ink on the market. Stretch, bend, twist, squeeze or fold, XFLEXX will not crack or distort. XFLEXX is available for any of our flatbed digital inkjet printers.

XFLEXX is a game changer in the inkjet printing industry. No longer are you restricted to hard substrates such as plastic, glass, wood and metal. XFLEXX allows you the option to print on foam, rubber, polyurethane, nylon, canvas, cellophane, felt and more! As your local Salesperson for details!

### STANDARD FEATURES

- Does not crack - bend it, stretch it, squeeze it!
- Runs the same color profile as the hard UV inks
- Superior durability for sports balls
